

# WHAT IS SERVERLESS COMPUTING ?

# WHAT IS SERVERLESS COMPUTING ?

- Cloud based computing model
- Cloud provider acts as the server and rents the resources such as **compute time** and **memory**
- The unit of execution is often a function:
  - **FaaS** – Function as a Service
- Pricing is based on the actual amount of resources consumed

# WHAT IS SERVERLESS COMPUTING ?

- Why „**serverless**” ?
  - Server management and provisioning are completely hidden from the developer
